

Choosing a physician?

Count on Catholic Medical Partners.

As a First Choice member, you have access to hundreds of doctors and dozens of locations in the First Choice network. First Choice recognizes the importance of maintaining established doctor/patient relationships, and in most cases, there is no need to change your physician. However, if you do not have a primary care physician – or you'd like to change your current primary care physician or specialist – **we recommend that you select a Catholic Medical Partners (CMP) physician.**

Catholic Medical Partners is a network of nearly 1,000 primary and specialty care physicians committed to providing high quality, coordinated care, and to working collaboratively with the network of resources provided by Catholic Health. Their commitment is about more than medicine – it's a promise to you and your family to provide the care you need with the compassion you deserve.

As a First Choice member, you will receive the highest benefit coverage level for hospital-based and ambulatory services by selecting a primary care or specialist physician with admission privileges at Catholic Health or an affiliated First Choice network facility.

For options, search the CMP physician directory at **catholicmedicalpartners.org** or call **HealthConnection at (716) 447-6205**, 7:30 a.m. to 6 p.m., Monday – Friday to request additional information.
